SUMMARY

A professional with experience as a Lecturer and Intern Programmer, specializing in software development, web and mobile application development, and computer networking. Skilled in building practical and responsive applications using PHP, Java, Laravel, Vue, React, and React Native. Strong in problem solving, system development, and troubleshooting, with the ability to work independently and collaboratively in a team environment.

KEY SKILLS

Languages: PHP, Java, C, C++
Frameworks: Laravel, Vue, React, React Native (Expo)
Web: JavaScript, HTML, CSS, Bootstrap, jQuery, AJAX
Database: MySQL, PostgreSQL, Firebase
Tools: Git, GitHub, GitLab, Visual Studio Code, Cursor, Docker, XAMPP
Development: OOP, MVC, API Integration, Responsive Web Design
Networking: TCP/IP, IP Addressing, DHCP, PPPoE, Network Configuration & Troubleshooting
Professional Skills: Problem Solving, Analytical Thinking, Communication, Teamwork, Adaptability

EXPERIENCE

Lecturer, Caraga State University - Main Campus, Butuan City **Aug 2024 - Aug 2025**

- Taught programming, computer networking, computing, and mathematics-related courses.
- Developed course syllabi, instructional materials, laboratory activities, and assessments.
- Guided students through technical activities, academic projects, and research while evaluating their performance.
- Collaborated with faculty members on curriculum development, instructional planning, and departmental activities; prepared grades, reports, and other academic requirements.

Intern Programmer, AFMB Corporation - AFTECH, Butuan City **Feb 2024 - Jun 2024**

- Developed and maintained front-end and back-end components of web applications.
- Integrated APIs, implemented features, and utilized frameworks and libraries to improve functionality and performance.
- Debugged, tested, and optimized applications while supporting CI/CD development and deployment workflows.
- Configured network devices and collaborated with the development team on software implementation, testing, and troubleshooting.

EDUCATION

Bachelor of Science in Information Technology **Aug 2020 - Jun 2024**

Caraga State University - Main Campus, Butuan City

- Cum Laude

PROJECTS

SmartHR and Network Valve- A Web Application for AFTECH System

- A web application featuring HR automation through SmartHR and network device management through Network Valve, with subscription management, printable vouchers, and MikroTik integration.

iSafeButuan: A GPS-Enabled Android Mobile Application Enhancing Citizen-Police Collaboration for Incident Reporting and Emergency Response

- Developed a public safety system using ReactJS, React Native, and Firebase, featuring GPS-based nearest police station detection, anonymous incident reporting, emergency assistance, and police station information.

AutoMobile Company - A Web-Based System for Managing Vehicle Transactions with Multi-Authentication

- Developed a vehicle transaction management system using Laravel, MySQL, HTML, CSS, and Bootstrap, featuring multi-role authentication, vehicle and parts management, sales tracking, search/filtering, and CRUD functionality.

Task Manager App – A Full-Stack Web Application for Organizing and Managing User-Specific Lists and Tasks

- Developed using Laravel and Vue with user authentication, CRUD functionality, task tracking, search/filtering, and responsive design.

P**ageTurner – A Web-Based Blog Application for Creating, Managing, and Publishing Articles**

- Developed a responsive blog application using React and Firebase with user authentication, CRUD functionality, article tagging, and search/filtering features.

ClientQueue – A Java Console -Based Application Simulating Client Line Management Using Queue and Stack

- Developed a Java console application demonstrating FIFO queue and LIFO stack operations for regular and VIP client management, including priority-based serving and dynamic queue behavior.

Enrollment System - A Java Console-Based Application for Managing Student Enrollment and Subject Registration

- Developed a Java console application for managing student and subject records, enrollment, and record searching using ArrayLists, input validation, and object-oriented programming.

Book Rental System - A Console-Based Application Developed in C for Managing Book Inventory and Rental Operations

- Developed a C-based console application for managing book inventory, rentals, borrower records, and returns, with search functionality and validation for book IDs and available copies.

CERTIFICATES

- **Networking Basics** — Cisco | Aug 11, 2026
- **Instructor 1 Years of Service** — Huawei ICT Academy | Mar 22, 2025
- **Software Development and Design Thinking** — DICT Caraga Region | Jun 2025
- **Introduction to UI/UX Design** — DICT-Surigao del Sur | Jun 2025
- **Introduction to Application Development for Startups** — DICT-Surigao del Sur | Jun 2025
- **Graphic Design with AI-Powered Canva for Beginners** — DICT Region XII (SOCCSKSARGEN & LaMa) | May 2025
- **Web Development: An Introductory Workshop** — DICT Region 2 – Isabela Provincial Office | Apr 2025
- **TOPCIT — Institute for Information & Communications Technology Planning & Evaluation (IITP) |** Aug 10, 2024
- **Business Model Canvas, Intellectual Property Rights, and Business Pitching Workshop** — Caraga State University – Main Campus Navigatu | Jun 2023
